

Unit 1

1. What is Business Intelligence? What Are Its Applications
2. Importance Of Business Intelligence
3. Architecture Of Business Intelligence
4. Explain Data, Information and Knowledge
5. What is Decision Support System? Factors Affecting Success in DSS
6. Phases in Development of Decision Support System
7. Classification Of Decisions according to scope and nature
8. Explain System. Explain Closed and Open Cycled System

Unit 2

1. What is Model? What are the Phases in Development OF Mathematical models
2. Application Of Data Mining
3. Explain Predictive and Optimization Models
4. Data Validation
5. Data Transformation
6. Data Cleaning
7. Division OF Mathematical Models according to Characteristics, Probabilistic Nature and Temporal Dimensions
8. Supervised vs Unsupervised Learning
9. Process of Data Mining

Unit 3

1. Types OF Classification Models
2. Types Of Clustering Models
3. Evaluation of Classification Models
4. Evaluation Of Clustering Models
5. Naive Bayes Classifier
6. K Means Clustering
7. Confusion Matrix
8. Support Vector Machines
9. Partitioning And Hierarchial Clustering
10. Agglomerative and Divisive Hierarchial Methods

Unit 4

1. Market Basket Analysis
2. CCR Model
3. Data Envelopment Analysis
4. Supply Chain Optimization
5. Revenue Management System

6. Sales Force Management
7. Logistics Planning
8. Relational Marketing

Unit 5

1. Knowledge Management
2. Knowledge Management Activities
3. Knowledge Engineering
4. KMS Lifecycle
5. Expert System & Applications
6. Explain How AI and Intelligent Agent support Knowledge Management. Relate XML To Knowledge Management & Knowledge Portals
7. AI vs NI
8. Machine Learning Process, Tools
9. Tensorflow
